

The RoBAT “integrated” range for backplane test

Common test programming suite for easy migration

20+ installed

RoBAT S1

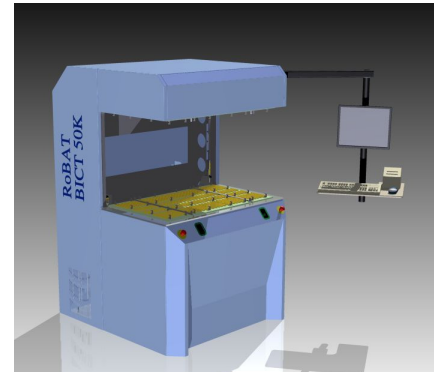

Fixtureless AOI + electrical
For: New product testing
Low/medium volume +
High complexity

2 installed

RoBAT RXI

X-ray + AOI
For: Bent pins
Turned under pins,
Solder voids etc

Released Q1 2010

RoBAT BICT 50K

Fixtured electrical test
For: High volume
All measurement types
Cont/isolation, analogue

Released Q3 2010

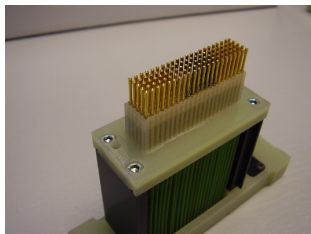

RoBAT RCI

Controlled impedance
Testing. For:
TDR, TDT, S-parameter
Differential impedance

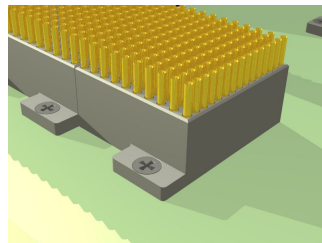

To support the 4 machines above we have to also supply this tooling.

Modules

For new connectors

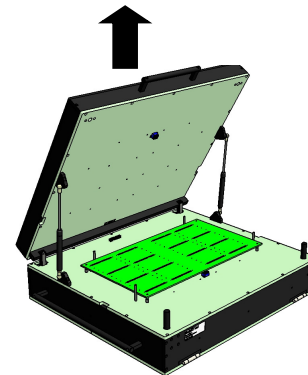

Custom Spring Probes for backplanes

Test Fixtures

For new backplane types.

For Testronics Machines also.
